

Material (Colors and decors)

Plastic colour:

C078 dolphin grey (≈ NCS S 4500-N).

Plastic parts are used for small parts and also for seat shells. Seat shells are made from polypropylene. Polypropylene is a particularly impact- and scratch-resistant material. The use of the individual colours is defined in the product information for the furniture.

Important note. Material and colour charts produced by printing can deviate slightly from the original and the colours are not necessarily exactly true. The same applies to ink-jet or laser prints from PDF files.
