

**Material (Colors and decors)****Plastic colour GrateNells:
CG001, CG011, CG021 red.**

Plastic parts. GrateNells boxes are made from polypropylene. Polypropylene is a particularly impact- and scratch-resistant material.

Important note. Material and colour charts produced by printing can deviate slightly from the original and the colours are not necessarily exactly true. The same applies to ink-jet or laser prints from PDF files.
