

Material (Colors and decors)

Wood stain colour:

H045 beech broom yellow (≈ RAL 1032).

Wood stain colours are used for seat shells and panel edges. At VS, these are usually made from beech. After cutting to size and sanding, the beech parts are either given several coats of clear varnish, stained and varnished or painted. Only water-based **wood stains and paints** are used.

Important note. Material and colour charts produced by printing can deviate slightly from the original and the colours are not necessarily exactly true. The same applies to ink-jet or laser prints from PDF files.
