

Finished back. Base panel.

Constructed of perforated-metal or melamine-resin laminated chipboard with glued-on (KU) plastic edges or sound-absorbing board with horizontal slots. All types can be retrofitted and enable the cupboard to be used as room divider.

Constructed of solid metal with attachment to clip onto the adjustable feet of the body elements.

The following material groups are available: Rear panel made of steel: M2; Rear panel made of chipboard: L6.
