

Product information

Series 800

Adjustable shelf inserts for shelf units and swing-door cabinets, cabinets with glass sliding doors and vertical roller shutters.

Adjustable shelf inserts are available in melamine-resin-coated chipboard and MFB board, each with glued-on plastic edges and made of powder-coated sheet steel. The shelf inserts can be freely positioned by means of shelf supports in the holes and secured against slipping out.

The following material groups are available: Bases made of chipboard: L6.
