

Product information

Sonis

Connectors.

The adapters enable the combination and connection of 2, 3 or 4 baffles. Linear and/or at right angles. There are different adapters depending on the absorber type. For baffles up to 112.5 cm or 3OH, 2 adapters are required; for higher baffles, 3 adapters are required.

The following material groups are available: Front made of steel: M(black, white).
