User Information

Hokki® The dynamic stool for active sitting

Hokki+® Height-adjustable dynamic stool for active sitting

Model: 03825, seat height 31, 38, 46 or 51cm (corresponding to seat size 2, 4, 6 and 7 according to DIN EN 1729).

Area of use: Hokki is a seat for indoor use. It is suitable for both children and adults. It is available in five seat heights. Thanks to its rounded base, it can move in all directions and promotes ergonomically desirable, active, dynamic sitting. Hokki models with foam seats can be stacked to tidy them away (see figure).

Material: The body of the Hokki consists of pure, recyclable polypropylene and the base is made of a non-slip plastic material that is kind to the floor surface. The seat is covered with foam or padded artificial leather.

Cleaning: You can clean every bit of the Hokki using a damp cloth or soft sponge. If necessary, add a gentle cleaning agent to the water (neutral cleaning agent or soap). You should treat any marks on the foam surface directly and wipe them off with a damp leather cloth.

Transfer/disposal: Only pass on the Hokki to anyone else together with this information for users. To dispose of it in an environmentally responsible way, please contact your local authority.

Disclaimer: If you use the Hokki for anything other than its intended use then we can unfortunately accept no liability.

Model: 03813, seat height 38-50 cm (corresponding to seat size 4-7 according to DIN EN 1729).

Model: 03814, seat height 50-68 cm (corresponding to seat size 7 according to DIN EN 1729 and higher).

Area of use: Hokki+ is a seat for indoor use. It is suitable for children as of a height of 1.35 metres and for adults. It can move in all directions and promotes ergonomically desirable, active, dynamic sitting. It is available in two height adjustment ranges.

Material: The body of the Hokki+ consists of pure, recyclable polypropylene and the base is made of a non-slip plastic material that is kind to the floor surface. The seat is covered with foam or padded artificial leather. The Hokki+ is continuously adjustable via a gas spring. This can be activated anywhere under the seating surface and is secured against incorrect use.

Cleaning: You can clean every bit of the Hokki+ using a damp cloth or soft sponge. If necessary, add a gentle cleaning agent to the water (neutral cleaning agent or soap). You should treat any marks on the foam surface directly and wipe them off with a damp leather cloth.

Transfer/disposal: Only pass on the Hokki+ to anyone else together with this information for users. To dispose of it in an environmentally responsible way, please contact your local authority.

Disclaimer: If you use the Hokki+ for anything other than its intended use then we can unfortunately accept no liability.
