Stylus for interactive whiteboards and displays.

The styluses for ActiveBoards of VS ensure versatile use of the existing whiteboards. They are characterised by different functions in teaching and learning situations. The technology-free or digital styluses with ergonomically appealing design are suitable for both right-handed and left-handed users. Our digital styluses also offer a long battery life. If the tip of the stylus stops working properly, we offer replacements for exchange. If your styluses or pen tips are not on this list, please feel free to contact us by email or even by phone.
