**Educational Furniture**. VS has always been focused on designing inspiring spaces for learning. As one of the leading manufacturers of school furniture and a full-range supplier with a wide portfolio, this is what we offer our customers: comprehensive, stimulating furniture solutions for educational establishments. In addition, we offer an extensive range of services such as planning, project support, and customer service.

Our products stand out for their quality, functionality, and durability, as has been proved by comparisons worldwide. Sustainability is extremely important to us, as is safety.

We hope you enjoy browsing, discovering new ideas, and planning your space! If you need answers to any questions, advice, or project support, our qualified customer support staff will be delighted to assist you personally.

# Concept

With the help of functional and easy to arrange furnishings, ***spaces become flexible*** and can be ***quickly adjusted*** to the changing instructional requirements.

# Shift+

**Differentiation in instruction.**
The modern school day has a diverse rhythm. Working as a class alternates with learning alone or in a group, and there are also rest periods. The space must, therefore, be changeable on short notice – allowing, for example, a large circle of chairs as well as a teacher-centered lecture or concentrated quiet work.

**With Shift+, spaces can quickly adjust to changing requirements.**
Students and teachers are in a position to make new configurations themselves, without having to call on others for assistance. In this way, the classroom gains new perspectives – and additional teaching and learning possibilities.

# Recreating *the* learning *environment*

Shift+ is the solution for flexibility – not every student has to have an individual desk at their disposal. This set-up can have a diversified offering of single and group desks that are used as the situation calls for, as the illustrated sketches on the next page show.

The quality and agility of school furniture must prove itself during everyday school activities. When providing real differentiation, the restrictions and limitations of traditional school furniture soon become evident. Shift+ furniture truly liberates the classroom from these restrictions and limitations, creating a wealth of new freedom in space design – aiding and assisting students in their individual, personal learning development. With functional, easily arranged furniture, spaces can be altered quickly and simply. It takes just minutes to configure and optimize for a variety of teaching phases throughout the school day.

**Classic instructional situation.**

**Differentiated learning environment.**

**Multi-functional work area.**

# **Agile furniture** *for functional* **learning landscapes.**

Together with architects and designers, VS is a part of the international project *The Third Teacher*.

**The significance of the space: Maria Montessori.**

As a leading school furniture manufacturer, early on VS had already incorporated the educational significance of the spatial environment in the development process. The original Berlin firm of VS had rights to produce and distribute Montessori materials in 1913. Maria Montessori wanted to support children in practicing their abilities themselves. Not only learning materials, but also furniture, spaces, and architecture should be adapted to it.

Children's House at the Fröbelseminar, Hamburg, around 1930.

**The Third Teacher.**

School architecture, space organization, and furniture are said to contribute to activating education potential. The space becomes in this way (with a concept from the Reggio Emilia approach of Loris Malaguzzi) the "third teacher" – in addition to the adults and the other students – and has a decisive influence on the school success of the children. Especially with full-day schools, the learning and living area must be set-up in a differentiated and diverse way.

**Furniture that promotes movement.**

The mind needs the whole body in order to learn. Monotony in instruction, in combination with constantly sitting still, leads to mental stagnation. The many spontaneous movements of everyday life are of decisive importance for health and performance. This is the only way children can develop fully. For this reason schools today are schools in motion. Movement is integrated into instruction to maintain attention and concentration.

# **David A. Stubbs II** *on the development of* **Shift+**

**Shift+** was created out of necessity. We realized we were at a crossroads generated by the inherent need to harness a dynamic shifting of educational delivery and instructional models implemented, as well as demanded, within our facilities. We knew we needed to institute more freedom by the creation of a new idea in educational furniture design. We needed a holistic solution that was complex but at the same time simplistic.

Our goal is to allow educators to begin with a blank canvas by selecting a set of tools that respond to their specific learning and teaching environments at a precise point in time. We were careful to ensure that these tools did not come with accoutrements or components that would hinder the instructional model. We are empowering the stakeholders to efficiently move selected accessories in and out of the space, depending on what they are trying to accomplish.

**Shift+** supports the unlimited variety of learning possibilities and teaching styles in the most simplistic way possible. Every component within the **Shift+** family is light and mobile. They can be easily reorganized. They can be efficiently stacked, creating open areas. They are not constrained to a specific educational space. They are specifically designed to be transitioned as well as repurposed throughout a school facility.

Each element within the family of components nests with each other in an unlimited set of configurations and arrangements. Storage elements become detached from wall surfaces, becoming integral multi-functional pieces within educational spaces. Technology also becomes mobile as well as transparent with **Shift+**.

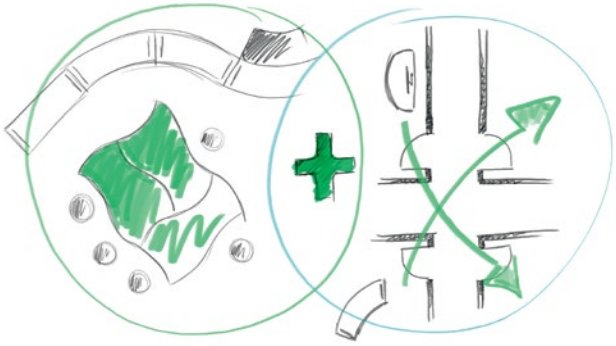

The elements of **Shift+** allow educators to continually find new applications - to redefine their individual learning environment every day. The crucial differences **Shift+** offers in school furniture will make educational environments more diverse than ever before.

**Watch David's thought starters and product tutorials**

# The *8 principles* of **Shift+**

1. Reduce Clutter
2. Enhance the Environment
3. Integrate Wireless & Transparent Technology
4. Create Multi-Functional Tools
5. Respond to Multiple Teaching & Learning Styles
6. Fun, Inviting, Engaging
7. Adaptable, Flexible & Recoverable
8. Establish Total Mobility

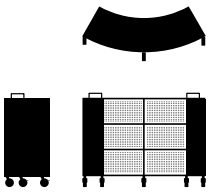

"The **elements of Shift+** *allow educators* to **continually find** new applications."

# Shift+

## Even more inspiration.

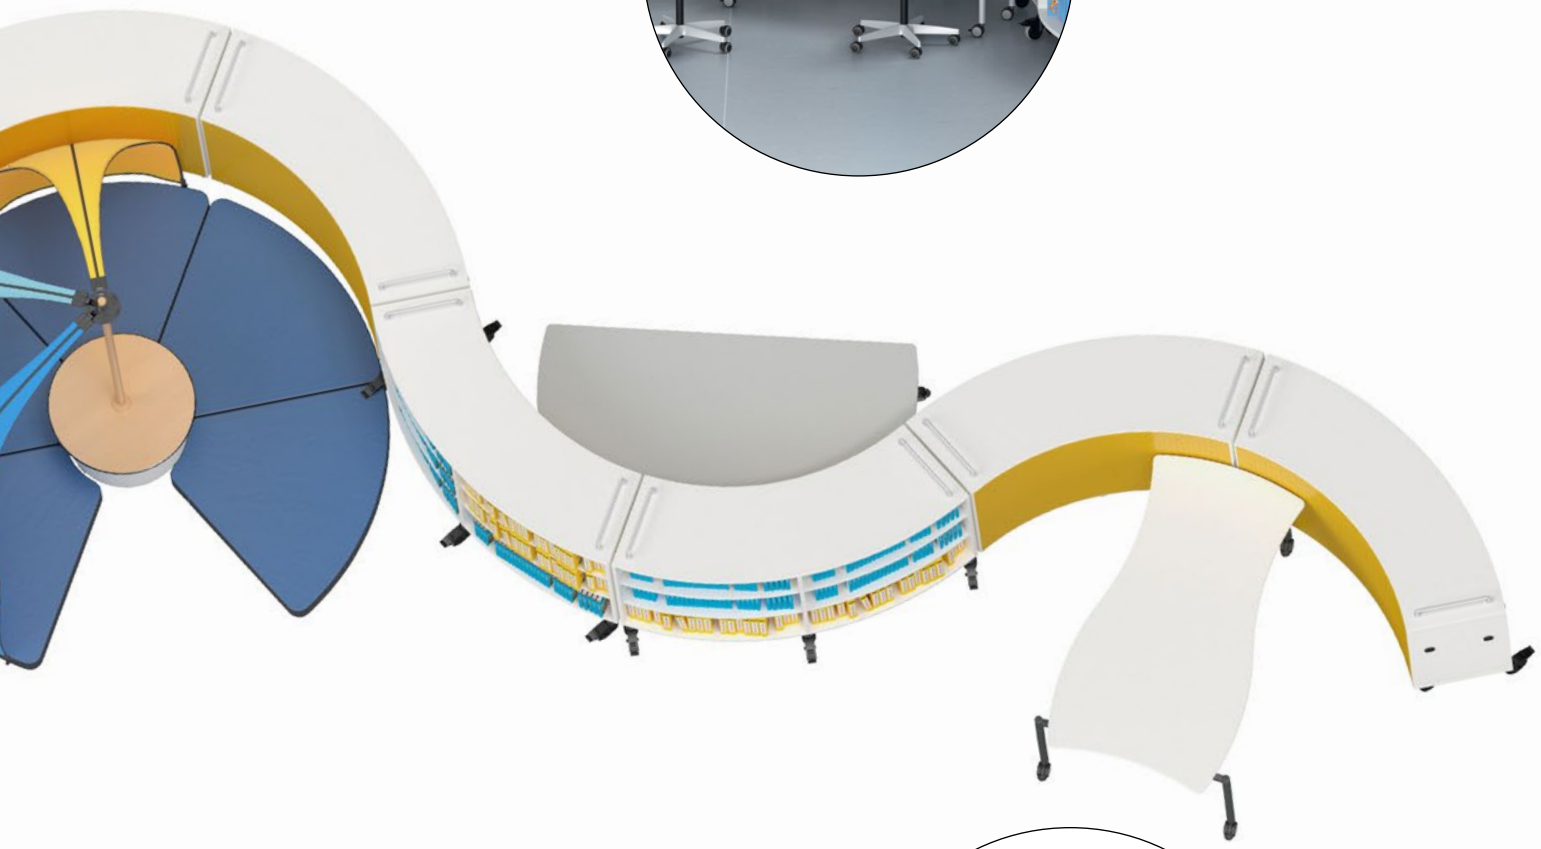

**Shift+** offers a range of solutions. The system was built with speed and agility in mind, resulting in a variety of possibilities throughout the school day. The elements invite both teachers and students to utilize the furniture to meet their specific needs – but also feel comfortable in the learning environments they create. Different teaching and learning situations require new, fresh approaches, specifically attuned to a variety of educational focuses. The furniture elements can be used in a wide range of spatial contexts – in classrooms as well as in libraries, hallways, or multipurpose spaces.

The elements in the system can be freely combined thanks to the harmonized inside and outside radii.

Semicircular, mobile group tables can also create computer workstations.

Soft seating elements can also be integrated to create informal seating areas.

Group tables are perfect for collaborating.

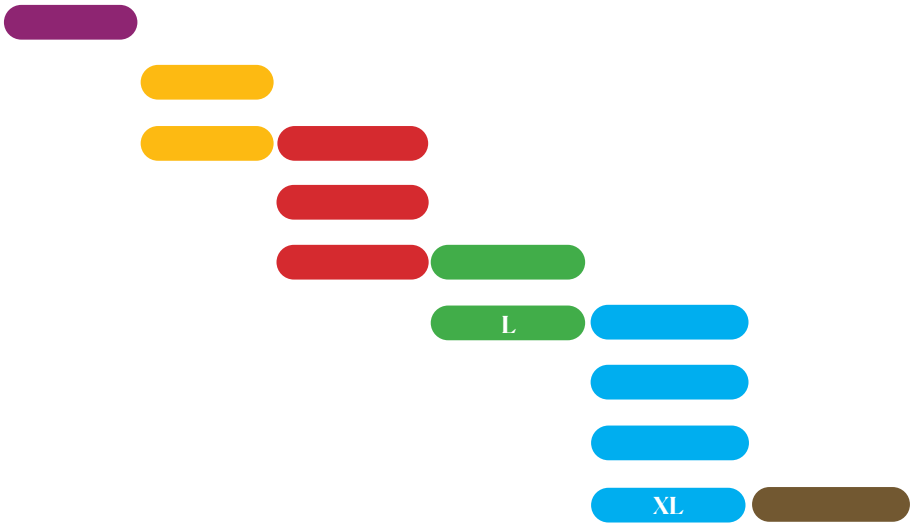

# *Size Guide*

Every student is different and learns in multiple ways. **Shift+ tables** support this high individuality with differentiated configurations which are easy to create, and meet the most diverse needs.

| | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|
| | 3'6"- 4' | 3'9"- 4'7" | 4'4"- 5'2" | 4'9"- 5'9" | 5'2"- 6'2" | 5'8"- 6'9" |
| *Shell Size* | S | | M *(Comfort L)* | | L *(Comfort XL)* | XL |
| *Seat Height* | 12.25 | 13.8 | 15 | 16.95 | 18.15 | 20.1 |
| *Table Height* | 20.9 | 23.25 | 25.2 | 28 | 29.95 | 32.3 |
| *Standing Table Height* | | | 34.65 | | 41.75 | 47.25 |

**Recommendations** *by Grade Level*

**Size Guide Recommendation:**

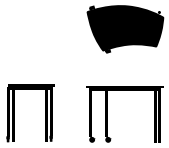

One size ***does not*** fit all—customizing seating and tables enhances collaboration and productivity.

# Shift+ ThumbPrint

Stackable four-legged tables (concave/convex).

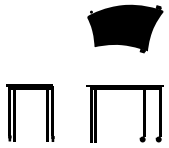

What makes this elegant, easy to move student's table so special? For starters, the sides mirror one another with their concave or convex design. Their curved, basic form results in a variety of combinations - including circles, rows, and freely shaped groups. The tables can also be equipped with two lockable casters for easy mobility. Up to six tables can be stacked and include stacking protection on the underside of the frame.

# Shift+ Fusion, FusionFlip, and BaseStation

Group tables (freeform, semicircular).

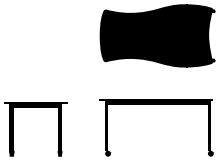

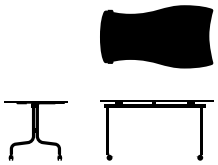

The **Shift+ Fusion** tables are available as four-legged versions, or with a folding tabletop (activated using a safety mechanism). The tables can be moved together creating larger sized group tables when needed. Thanks to the casters, they can be arranged easily by students of all ages. The **Shift+ BaseStation** group table can be nested with all tables since everything within Shift+ uses a 60° curve. It can be equipped as a mobile computer workstation when you add a monitor arm and CPU drawer.

Fusion, FusionFlip, and BaseStation tables available with stepped height adjustment using Allen key.

# Shift+ Interact

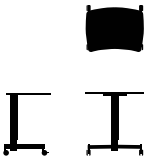

Teacher lectern and student table.

The **Shift+ Interact** is easily moved around the room, thanks to its four casters (two of which are lockable). The compact work surface, available in two shapes, ensures unhindered mobility; the optionally integrated bookshelf does not impede freedom of movement. The table is available in two fixed heights or continuously height-adjustable. The desired height can be easily achieved using a hand switch which is covered to prevent accidental activation. In the model with a square tabletop it is possible to add a modesty screen.

Shift+ Interact, optional modesty screen.

# **Shift+**

# *Storage & Soft Seating*

With the **Shift+** storage elements, soft seating, and padded mats, learning landscapes and differentiated areas within the classroom can be created quickly and easily. The curved storage can be combined in rows, or thanks to the 60° inner and outer radii, in circles or serpentine lines to form complex seating/ storage landscapes.

Storage elements available in different heights make it easy to divide the room and separate individual areas to create zones within the space. The mobile storage modules can be securely joined together thanks to the two optional side-mounted magnets. However, mobility doesn't stop at the classroom door. The shelf and storage elements are easily moved even when loaded thanks to the optional top-mounted handles.

# Shift+ Transfer

Cabinet options and accessories.

Available with casters (two lockable), or adjustable feet.

Mobile cabinets with optional handle.

Door handle options:

- Plastic bow handle
- Inset handle
- Metal bow handle
- Wooden bow handle
- No handle
- Knob

In all cases with a lock.

Compartments for backpacks, optionally with scratch protection.

Curved storage elements that match the **Shift+ Landscape** padded mats.

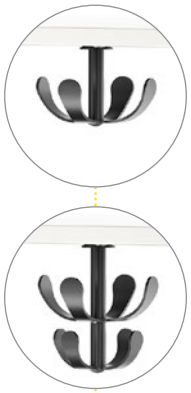

Shelf inserts positionable at 1 inch intervals.

Magnetic rear panel made from perforated steel.

Magnets for the secure connection of cabinet elements.

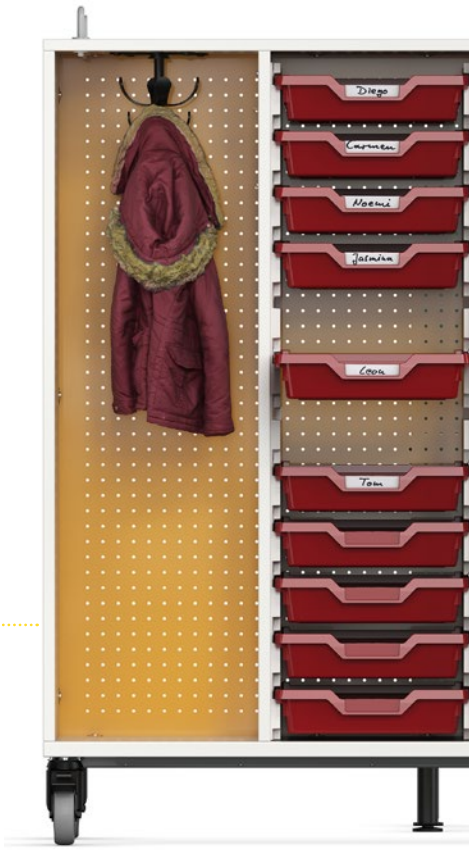

Wardrobe units with 4-way or 8-way hooks.

# Shift+ Transfer

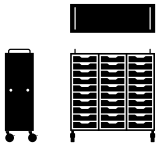

Storage for boxes, wardrobe, backpacks, and shelf inserts.

Laminated panels subdivide the extremely stable body of the storage element. Construction shelves are firmly attached in place and the rear of the steel perforated back panel can be used as a magnetic surface. The elements can be individually configured and equipped as storage for backpacks, wardrobe units with 4-way or 8-way hooks, plastic Gratnells boxes on guide rails, or with shelf inserts. Available with two external magnets on each side, making it easy to connect multiple cabinet elements. Optional steel handles can be attached to the top of Transfer units.

Model 45325, from left to right: Wardrobe, Gratnells (10 x 3 inch boxes), shelf inserts.

Wardrobe units with 4-way or 8-way hooks.

Model 45325, middle column with Gratnells (5 x 6 inch boxes).

Shelf insert.

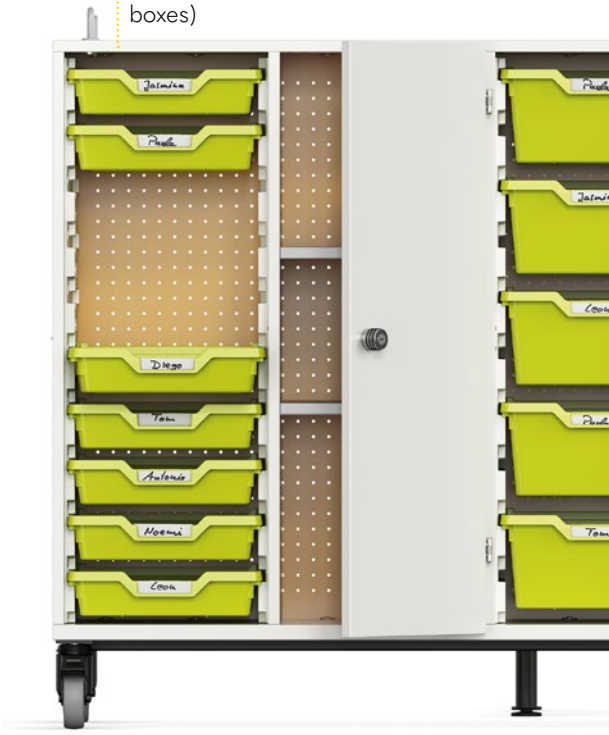

Cabinet rails with stoppers and pull-out protection prevent the accidental removal of the boxes.

# Shift+ Transfer

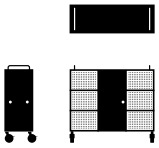

Storage with swing doors and boxes or with shelf inserts for multipurpose rooms.

The front of these **Shift+ Transfer** storage elements can be equipped with one, two, or three swing doors. It is possible to choose between bow or inset handles or knobs with a locking system. The bodies of the units can be subdivided as required. Sides with rows of drilled holes (1 inch) make it possible to position shelf inserts at different heights. It is also possible to integrate guide rails for plastic Gratnells boxes. The elements are easy to move using optional steel handles, and can be connected with optional magnets on the outer sides.

# Shift+ Transfer

Straight and curved storage with wardrobe or shelf inserts.

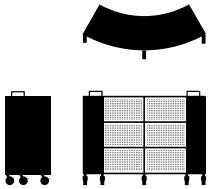

One particular strength of the **Shift+** system is that it permits solutions that don't adhere to any rigid pattern. That's why there are not only linear but curved shelving elements available in three heights, in single- or double-sided configurations, with options for shelf inserts or wardrobe hooks (4-way or 8-way). Thanks to the inner and outer radii, which are harmonized throughout the system, the elements can be moved together to form undulating lines or circles. They can also be optimally combined with upholstered elements, padded mats, or tables. This permits an unlimited number of new configurations that can be adapted for any situation.

Dimensions in inches WxHxD

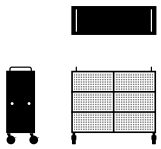

**Shift+ Transfer**
**Single-sided**

**Shift+ Transfer** elements, accessible from one side and as a back rest on the other (left) or accessible from both sides on two-sided models (right), with a panel separating the sides.

Wardrobe units with 4-way or 8-way hooks.

Shelf insert.

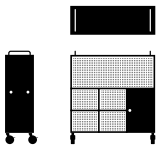

# Shift+ Transfer Teach

Mobile teacher storage element.

**Shift+ Transfer Teach** provides teachers a storage element with a lockable door for added security. As a free-moving element (with four technical casters, two of which are lockable), it can accompany the teacher to different locations within the building. The panels subdivide the lower part of the element; shelf inserts can be positioned using the rows of drilled holes (1 inch). The element offers a lockable door on the left or right, optionally with a cylinder or turn-knob lock. The top section is an open shelf for easy access to readily available material.

Dimensions in inches WxHxD

**Shift+ Transfer Teach**
Top: open shelving
Bottom: 3 columns with shelf insert,
and door with lock on the left or right

**45319** 41.55 x 43.4 x 16.75

Equipped with adjustable feet or 4 casters, 2 of which are lockable.

**Shift+ Transfer Teach** on casters, optionally with steel handles.

# Gratnells Boxes

Boxes for organizing materials in Shift+ Transfer elements.

The plastic Gratnells boxes give students their own private storage space, which are accommodated in corresponding organized cabinets.

There is a separate recess for the nameplate and pull-out protection molded into the shape of the box. Boxes that are stacked one inside the other are easy to separate thanks to the ribs on the base. The cover fits closely all the way round, resulting in a higher load-bearing capacity. When stacked, the covered boxes are slip-proof.

Dimensions in inches WxHxD

**Gratnells**
Small plastic box

**48565** 12.3 x 3 x 14.8

**Gratnells**
Large plastic box

**48566** 12.3 x 5.95 x 14.8

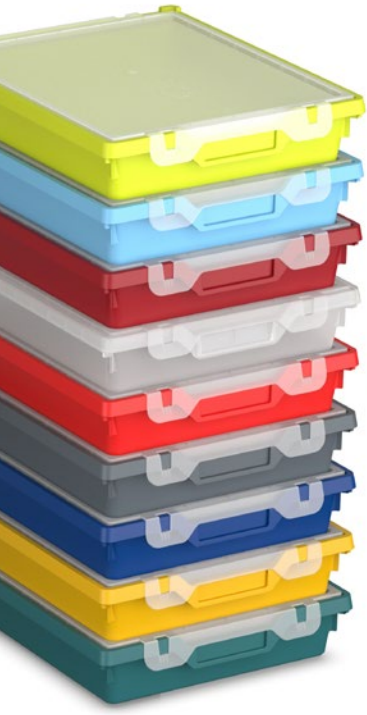

**Cover**
**48568** 12.3 x 14.8

**Nameplate**
**48567**

Ribs on the bottom prevent Gratnells boxes from getting stuck together when stacked.

Gratnells boxes were developed exclusively for VS.

To save space, Gratnells boxes can be inserted into one another (below) and stacked on top of one another when a cover is added (left).

Molded stoppers and cabinet rails with pull-out protection prevent the accidental removal of the boxes.

Recess for the nameplate.

# Shift+ Landscape

Upholstered seating elements.

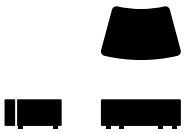

The straight or curved, upholstered **Shift+ Landscape** seating is available in three heights. Individual elements can be moved together to form complex circular or curved seating landscapes. This way, it's possible to design any type of informal group seating area. The seating elements are constructed from a stable base with glides and fixed foam padding with leatherette cover. It is possible to integrate matching storage elements (straight and curved) into this freely designed landscape; the straight version can be accessed from both sides.

Dimensions in inches WxDxH

# **Shift+**
# *Floor-Level Learning*

Who said schools always have to be conventional? That is certainly not the case with the exciting Shift+ floor-level elements. It's simple to integrate various tent elements into the overall design, providing exciting environments for a new world of learning experiences. The same applies to the lightweight stand and multipurpose units, which can be freely combined to create different types of surfaces on a maximum of two levels. Seating islands, low table or table/bench options intelligently combine a range of possibilities in a single unit.

The stand elements not only extend the options for new forms of learning but also rapidly provide a raised area for presentations or small group demonstrations. Everything fits together perfectly, making a significant additional contribution overall. Curtains up!

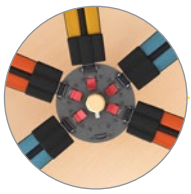

# Shift+ Landscape

Padded mats, carpets, and Leaf tent elements.

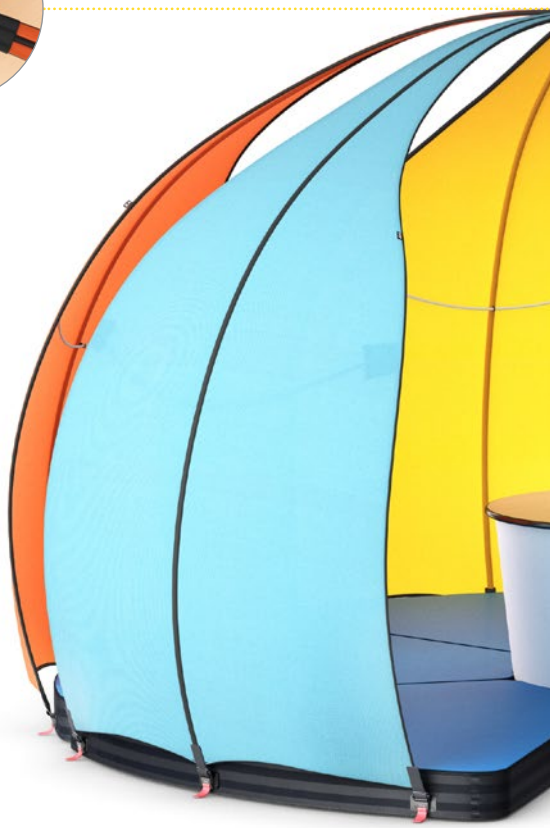

Shift+ Landscape can be used quickly and easily to create environments suitable for floor-level learning. Comfortable, slip-proof padded floor mats are perfect for lying, sitting, kneeling, or crouching. The **Drum** table is the ideal accompaniment, with its stable, lightweight plastic body. The **Drum** fits conveniently in any corner and can be moved quickly to the center of the activity. When you remove the top, there is a large amount of storage space.

One important consideration when developing the **Leaf** tent elements was that they had to be easy to put up. The solution: The elements quickly attach to the floor mats 09446 and 09447 using magnetic fastenings. The wide side of the **Leaf** element fits on the long edge of the mat and the point at the top can be fastened into the opposite edge of the mat.

Alternatively, the top can be connected to the wooden pole and tensioned. Using magnetic fixings, it can be fastened to any magnetic surface, including the metal backs of the Shift+ Transfer storage units. When the element is no longer needed, simply roll it up and stow away in the corner or store them in an accessories bag.

The top of the pole can be used to fix a maximum of six sails.

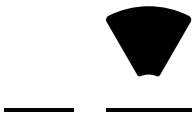

Leaf can be easily rolled up and fastened with velcro fasteners.

Magnetic fixings can be used to fasten the system to any magnetic surface.

Leaf attaches to the rectangular and 60° padded mats simply and securely.

The tent pole can be positioned directly on the floor or inside the Drum table.

**Shift+ Landscape**
Padded mat

**09437** 45.1 x 45.1 x 3.15

# Shift+ Up

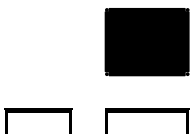

Table-bench stand for presentations and floor-level learning.

**Shift+ Up** is both a stand and a lightweight multipurpose seating/table element that can be combined with all of the other elements of the floor-level learning and the Shift+ series of furniture.

It can be used as a low stand (a maximum of two units high). The elements are combined to form different landscapes and the sides can optionally be closed off with an insertable panel. To keep them secure, they are joined to each other using horizontal connectors. The elements can also be rotated against one another.

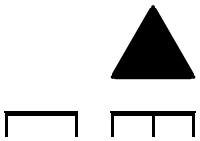

Shift+ Up is also suitable for use as a seating surface, a low table, or as a table-bench combination. This is where the reversible top comes into play: One side is non-slip and used for standing on, the other is used as a flat writing surface. If the element is used as a table then Gratnells boxes can be included.

**09454** 38.6 x 8.9

**Shift+ Up**
Transport cart

**09456** 68.75 x 32.7 x 35.85

The stands can be screened on all sides.

The transport cart can hold up to 6 Shift+ Up frames and tops.

Two stand elements can be placed on top of one another (h=23.25 inches).

Horizontal connectors join the lower-level elements together.

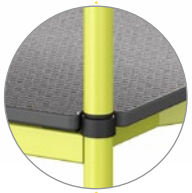

On the 1st level you can use Gratnells boxes.

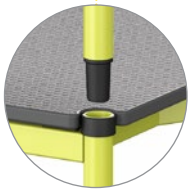

The top level is attached to the lower level using a secure catch.

The textured side of the reversible top is used to stand on and the smooth side acts as a writing surface.

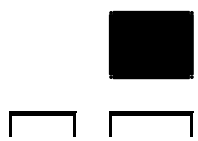

The reversible top can be removed from the frame without the need for any tools.

# Ergonomic *Sitting*

The JUMPER® and Panto chair models are perfectly suited for the school environment. The ergonomic design ideally matches the flexible, versatile, and easy-to-combine **Shift+** furniture. They are equally at home in classrooms, libraries, conference rooms, and main halls.

# JUMPER Chairs

JUMPER Air Move, JUMPER Air Four, and JUMPER Air Active.

JUMPER Air is characterized by its double-walled, air-cushioned seat shell, manufactured from recyclable polypropylene. It is outstandingly comfortable, even when sitting for long periods. It's surface also has non-slip properties. **JUMPER Air Move** is a continuously height-adjustable swivel chair with a patented 3D rocking mechanism for dynamic sitting. It positively encourages regular changes between different, ergonomic seating postures. **JUMPER Air Four** is a classic four-legged chair that blends easily into a wide range of environments. The **JUMPER Air Active** cantilever chair has a seat surface that tilts forward when the user is working at a desk. When leaning back, the shell tilts accordingly, allowing the spine to actively relax. The chairs are also available as JUMPER Ply versions, with an ergonomic molded wood seat shell.

JUMPER Air Move stores easily on a desk thanks to the piggyback hook.

Dimensions in inches (height)

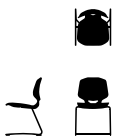

**JUMPER Air Move**
Height-adjustable swivel chair

**33502** 13.75 - 17.25
**33506** 16.5 - 21.35

**JUMPER Air Four**
Four-legged chair

**33300** 12.25, 13.8, 15, 16.95, 18.15, 20.1

**JUMPER Air Active**
Forward-flexing cantilever chair

**33400** 12.25, 13.8, 15, 16.95, 18.15, 20.1
**33401** 16.95 (L seat shell), 18.15 (XL seat shell)

JUMPER Air Move has continuous seat height adjustment and a 3D rocking mechanism for dynamic, ergonomic sitting.

JUMPER Air Four is available in 6 heights and can be stacked up to 5.

JUMPER Air Active easily rests on the top of the desk or table.

JUMPER Air Active is available in 6 heights and can be stacked up to 5.

# Panto Chairs

PantoMove-LuPo and PantoSwing-LuPo.

The PantoMove-LuPo swivel chair is continuously height-adjustable, featuring a unique patented 3D rocking mechanism. As body weight is shifted, the seat surface tilts accordingly, allowing freedom of movement essential for dynamic sitting and sustained concentration. In addition, the air-cushioned shell offers a high degree of seating comfort. The PantoMove-LuPo is equipped with a piggyback hook for suspension on tabletops. The forward-flexing PantoSwing-LuPo cantilever chair is also equipped with a comfortable air-cushioned seat shell. The inclination of the seat surface adapts ergonomically as the body's center of gravity moves forwards or backwards. The Panto chairs are also available as VF models with an ergonomically shaped, robust beech plywood seat shell.

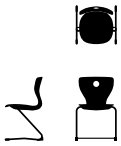

PantoMove-LuPo stores easily on a desk thanks to the piggyback hook.
